L'ingénierie du 21^e siècle

WINE CELLAR DESIGNERS

From design right through to delivery,
Process and Building Contracting,
Construction and re-organization.

We make the very
most of your project technically
and financially, providing open-ended
solutions. We then run site work to ensure
quick completion within the allocated budget.

MAIN REFERENCES

We intervene with co-operative and private estates and merchants. Over the last few years, we have tended to specialize in re-organization of wine co-operatives.

TVD (Hérault department in south of France) : creation of a co-operative to handle 100 000 hl of wine and re-use of the equipment recovered from 5 closed sites.

**Celliers de MEKNES (Morocco)
Bottling plant : 40 million parcels/year.**

Vignobles du Rivesaltais (South of France near Perpignan) : creation of a Co-operative wine cellar with 275 000 hl capacity after the merger between Salses and Rivesaltes.

Detail mission addressing Process and Buiding issues,

- definition of wine-making process paths,
- draft project,
- final projet with precise costing
- call for tender dossier
- consultation of tendering companies,
- detailed and comparative study of proposals,
- making out fixed price contracts,
- drawing up Works schedules,
- site supervision,
- assistance to bringing into service.

**Groupe Castel Meknès (Morocco) :
creation of a 85 000 hl production unit.**

**Groupe Castel (Tunisia) :
creation of a 20 000 hl wine-making unit.**
